Eon Instrumentation Opens Oceanside Rugged Power Supplies Division

Headed by General Manager Roy Miller

Volume 3 Quarter 1 | March 2016

Eon Instrumentation is pleased to announce the opening of its Rugged Power Supplies Division in Oceanside, California headed by Mr. Roy Miller. Roy has over forty years experience in the design, engineering and manufacture of rugged power supplies for the military and industrial markets. Roy was Vice President-Engineering of Mission Power Solutions, Inc. in Oceanside, CA and has designed power supplies for major defense and aerospace companies, including Northrop Grumman, Raytheon and L-3 Communications.

The Oceanside facility supplements Eon's Van Nuys facility, where Eon's other product lines are designed and produced. These include Electronic Blanking Control Units; Analog and High Speed (3Ghz) Digital Video Amplifier Splitters and Converters; High Speed Digital Cameras, Monitors, and Recorders; Audio Distribution Amplifiers; and Hardware/Software Engineering Support Services.
