EON Instrumentation Awarded Video Distribution Contracts for US Navy

Volume 5 Quarter 1 | February 2018

ADV-301-1340 Rack Mounted Video Distribution Amplifier

Eon Instrumentation was awarded a contract by Naval Surface Warfare Center, Port Hueneme, CA for a rack mounted video distribution amplifier. The Eon design consists of 40 channels of 1in/3out NTSC video. Power input is 115VAC for both laboratory and shipboard use. The first unit was delivered in September 2017 after a ninety day concept to delivery design and manufacturing cycle.

Eon received an order for three additional units from a Navy prime contractor for laboratory and shipboard application. These three units were delivered within sixty days ARO.

About Eon Instrumentation

Eon is a veteran owned multimillion company that designs, and manufactures military qualified products for airborne, ship, and ground vehicle platforms. These products include Analog and High Speed Digital Video Systems (splitter/amplifiers, converters, displays, cameras and recorders); Interference Blanking Units; Rugged Power Supplies; Audio Amplifier Systems; and Specialized Product Solutions. Eon operates out of two design/development/manufacturing facilities located in Van Nuys and Oceanside CA.
