EON Instrumentation Video Architecture

Volume 6.3 | February 2021

Analog, High Definition, Mixed Mode Video Systems

Whether you need a single unit to perform a unique function or a complete end to end architecture Eon can support your requirements with existing units or customized solutions. Eon's modular hardware and software subassemblies can be configured for specialized applications. All of Eon's units can process either CVBS analog, component, or SD/HD digital signals and can be easily combined into hybrid units. Eon's customized embedded power supplies compliment this approach to create optimum SWaP capabilities.

About Eon Instrumentation – Since 1961

Eon is a veteran owned multi-million dollar business that designs and manufactures military qualified products for airborne, shipborne, and ground vehicle platforms. These products include Analog and High-Definition Digital Video Systems (splitters, converters, selectors, cameras, monitors and recorders); Interference Blanker Units; Rugged Power Supplies; Audio Amplifier Systems; and System Engineering Programs.

Eon Instrumentation and Covid-19

Eon will continue to provide regular on-time shipments and support to all of its customers.
