

Eon Introduces Enhanced Customer Support Network

Volume 7.4 | June 2022

Eon was founded in 1961. Eon is a veteran owned multi-million-dollar business that designs and manufactures military qualified, rugged industrial and commercial products for airborne, shipborne, ground vehicle platforms, plus homeland security and flight test applications. These products include Analog and High Definition Video Systems; Blanking Control Systems; Rugged Power Systems; Audio Amplifier Systems; Space and Missile Systems, and Instrumentation Technology System's (ITS) Video Recorders, Time Code Generators and Inserters. Eon's customers include direct contracts with all US Military Departments, International and US Primes, Ranges and Commercial/Industrial Programs. Eon has a continuous IR&D program to develop new traditional and ITS products.

Eon Instrumentation is pleased to announce the appointment of five companies to enhance our customer sales and support worldwide. The companies supplement our regular website contacts. The companies can quickly answer questions and guide customers to appropriate website material or more in depth discussions.

Eon's Chief Executive Officer, Greg Ford commented: "As Eon continues growing with our new developments and following our acquisition of product lines from Instrumentation Technology Systems, we want to make sure that our customers can find and reach us anywhere in the world at their convenience. Eon is confident that the five outstanding companies that we have retained will help drive and support Eon's growth and sales worldwide."
