

EON Continues Record Bookings and Deliveries

Volume 7.11 | July 2023

In July Eon has won new and follow-on contracts valued in excess of \$2M and deliverable in 2023-2024. These are a result of our active new product development, new product acquisitions, and past performance satisfying customer needs and expectations. All product areas experienced growth and will accelerate Eon's revenue growth of 20% per year. Some highlights include:

- New Blanking Control Units for Ship, Ground and Aircraft platforms
- New Embedded Power Conversion Units
- Video Format Converters/Splitters/Encoders for Land, Ship, Airborne platforms
- Audio Distribution Units for Airborne platforms
- Multiple Instrumentation Systems for FAA, Homeland Security, and Range Test applications

In concert with this New Business success Eon has streamlined its Operations and Engineering to efficiently deliver products with optimum lead time and cost.

About Eon Instrumentation --- Since 1961

Eon was founded in 1961. Eon is a veteran owned multi-million-dollar business that designs and manufactures military qualified, rugged industrial and commercial products for airborne, shipborne, ground vehicle platforms, plus homeland security and flight test applications. These products include Analog and High Definition Video Systems; Blanking Control Systems; Rugged Power Systems; Audio Amplifier Systems; Space and Missile Systems, and Instrumentation Technology System's Video Recorders, Time Code Generators and Inserters. Eon's customers include direct contracts with all US Military Departments, International and US Primes, Ranges and Commercial/Industrial Programs. **Check Eon's Website for brochures or contact Eon at 818-781-2185 for help getting to the right engineering staff for additional discussion.**
