

EON wins 25M in Bookings for deliveries through 2030

Volume 7.11 | October 2023

In August through October Eon has won new and follow-on contracts valued in excess of \$25M over a 10 year period. Several of these products are DoD classified and Program of Record. Development and product deliveries have begun.

Blanking Control Units

Eon has developed sophisticated programmable BCU's. Multiple contracts at Army, Navy and Air Force installations

As a result Eon has won

Video Format Converters/Splitters/Encoders for Land, Ship, Airborne platforms

Audio

Distribution

Audio Distribution Systems

Specialized landing support systems

Instrumentation Systems For FAA, Homeland security, Test Ranges

In concert with this new business success Eon has streamlined its Operations and Engineering to efficiently deliver products with optimum lead time and cost.

About Eon Instrumentation --- Since 1961

Eon was founded in 1961. Eon is a veteran owned multi-million-dollar business that designs and manufactures military qualified, rugged industrial and commercial products for airborne, shipborne, ground vehicle platforms, plus homeland security and flight test applications. These products include Analog and High Definition Video Systems; Blanking Control Systems; Rugged Power Systems; Audio Amplifier Systems; Space and Missile Systems, and Instrumentation Technology System's Video Recorders, Time Code Generators and Inserters. Eon's customers include direct contracts with all US Military Departments, International and US Primes, Ranges and Commercial/Industrial Programs. **Check Eon's Website for brochures or contact Eon at 818-781-2185 for help getting to the right engineering staff for additional discussions.**
