Aerial Refuelling Amplifer Unit

About Eon Instrumentation --- Since 1961 Eon was founded in 1961. Eon is a veteran owned multi-million-dollar business that includes three development subsidiaries for design/manufacture of military qualified, rugged industrial, and commercial products for airborne, shipborne, ground vehicle platforms, plus homeland security and flight test applications. Eon's customers include direct contracts with all US Military Departments, International and US Primes, Ranges and Commercial/Industrial Programs.
